

LEQVIO® Patient Management Tracker: Instructions for Use

How to Access and Begin Using the Web Application

The Patient Management Tracker gives you one place to help your office track your patients taking LEQVIO. In order for the program to function correctly, it is important to make sure that you are properly extracting the files within the downloaded ZIP file.

Following the steps in this guide will allow for successful use of the tool. Click on your current operating system to view the appropriate instructions for use.

For Windows Users

- 1 Ensure that the **LEQVIO_Patient Management_Tracker** ZIP file that you have recently downloaded is saved to your desired location (eg, your Desktop or Documents folder).

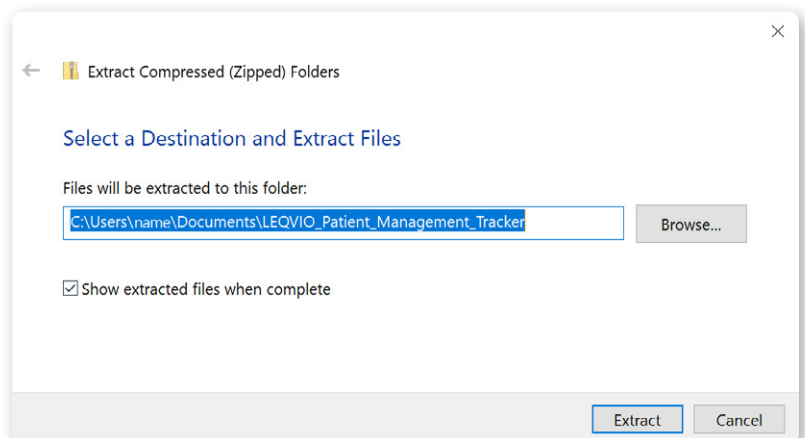

- 2 Go back to the ZIP file you recently opened. Right-click on the ZIP file and select "Extract All" from the contextual menu. This action will open the Extraction Wizard.

- 3 Follow the instructions in the Extraction Wizard to choose the destination location for the extracted files. Select a suitable location, such as the Desktop or Documents folder.

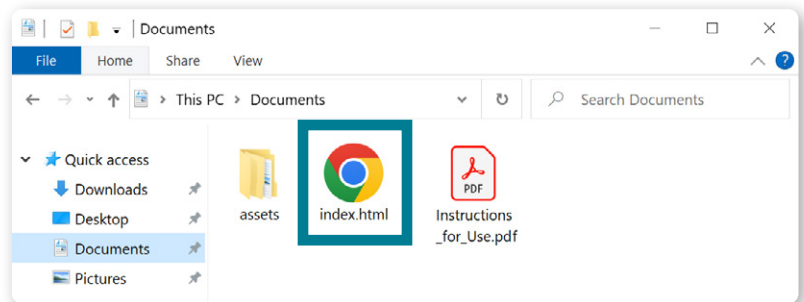

NOTE: Without properly extracting the zipped files, the Patient Management Tracker will not function correctly.

Make sure you save this resource somewhere that is easy to remember and access. All inputted data will save to the extracted resource.

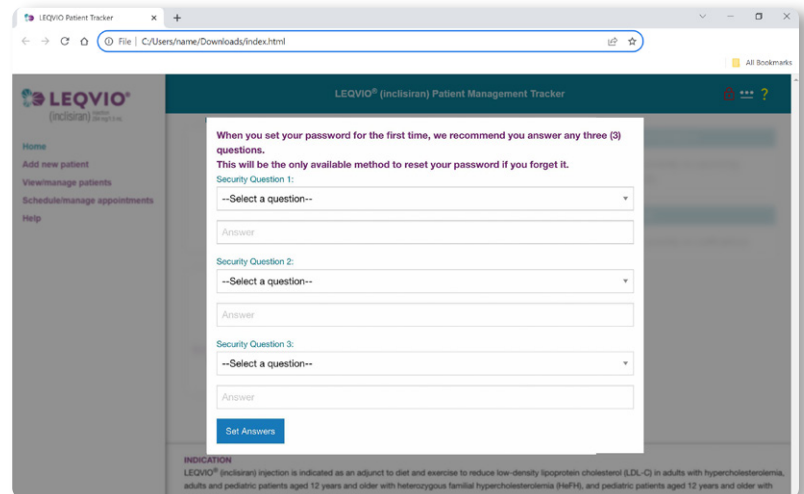

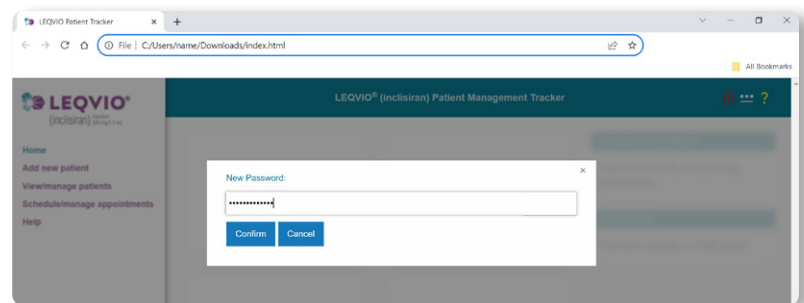

For Windows Users (continued)

- 4** Once extracted, you should see the "index.html" file.

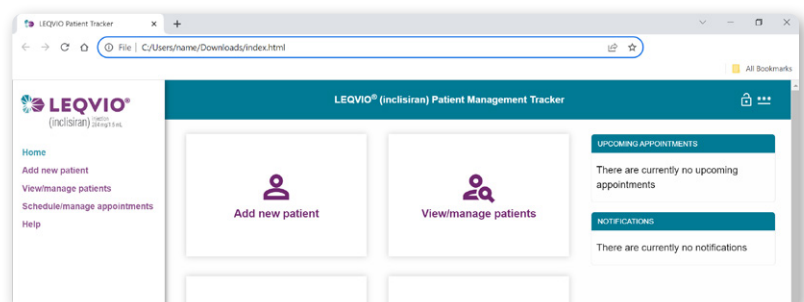

- 5** To start the web application, double-click on the "index.html" file. This will open in your default web browser, launching the application. Once these steps are taken, you will be prompted to create a password and set a series of security questions.

- 6** Once you have set your password, you may begin using the tracker.

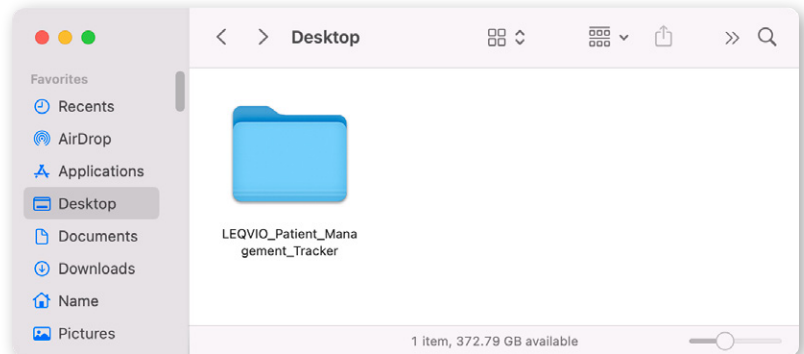

NOTE: When entering patient data into the tracker, new information will save automatically. There is no need to manually save your updates.

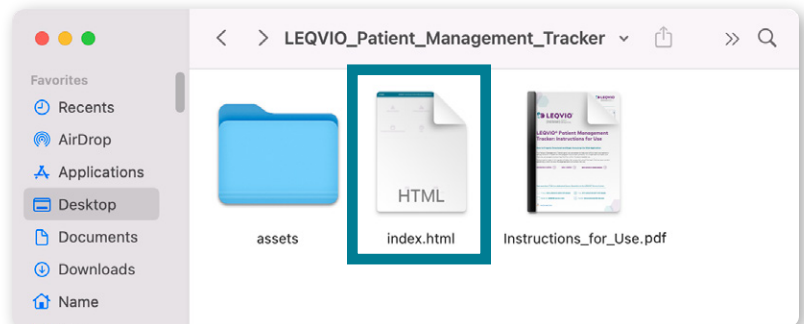

For Mac Users

- 1 Ensure that the folder titled "LEQVIO_Patient_Management_Tracker" was unzipped to your desired location (eg, your Desktop or Documents folder).

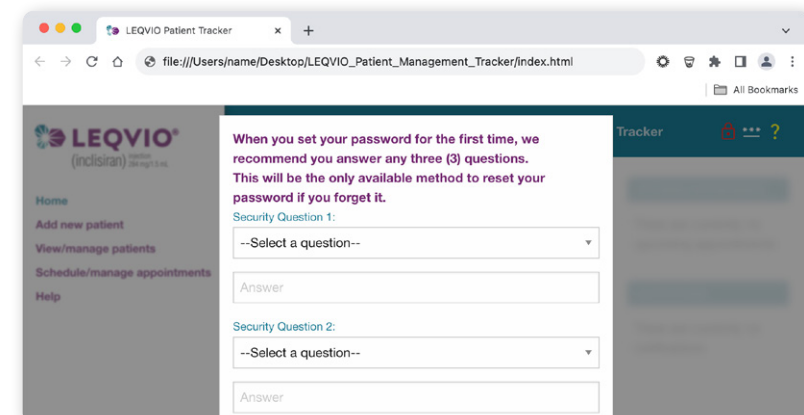

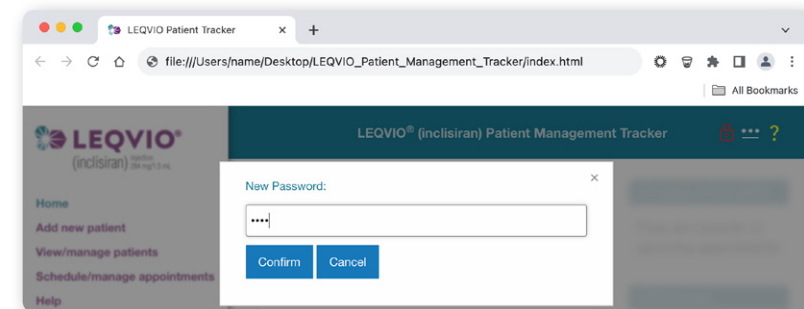

NOTE: Make sure you save this resource somewhere that is easy to remember and access. All inputted data will save to the extracted resource.

- 2 Double click on the "LEQVIO_Patient_Management_Tracker" folder to see the "index.html" file.

- 3 To start the web application, double-click on the "index.html" file. This will open in your default web browser, launching the application. Once these steps are taken, you will be prompted to create a password and set a series of security questions.

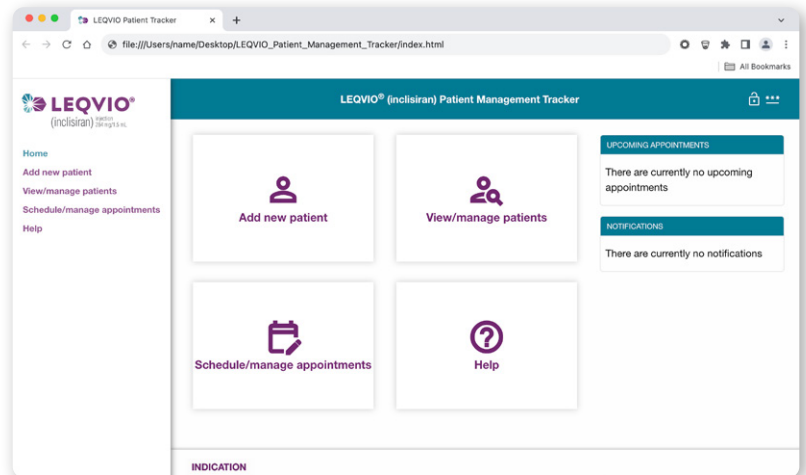

For Mac Users (continued)

4

Once you have set your password, you may begin using the tracker.

NOTE: When entering patient data into the tracker, new information will save automatically. There is no need to manually save your updates.

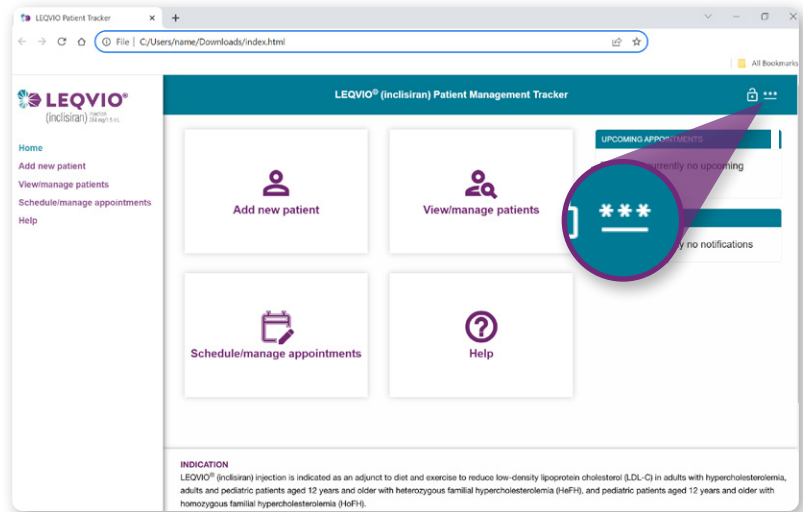

Important Reminders

It is recommended that you keep the extracted folder and its contents intact to ensure proper functioning of the web application.

If you encounter an issue with your password, you may reset it by following the steps found by clicking the  icon in the top right corner of the tracker.

NOTE: Novartis will not gain access to or leverage any patient data. The information you save within the tracker will not live on the internet, a server, or within your electronic health/medical record system. All the information you capture will live solely on your computer.

For any technical questions about the LEQVIO® Patient Management Tracker, please contact your Novartis Access & Reimbursement Expert.
